UNC  
SCHOOL OF GOVERNMENT

THE UNIVERSITY  
of NORTH CAROLINA  
at CHAPEL HILL

The School of Government at the University of North Carolina at Chapel Hill works to improve the lives of North Carolinians by engaging in practical scholarship that helps public officials and citizens understand and strengthen state and local government. The core components of the School are the Institute of Government, established in 1931 to provide educational, advisory, and research services for state and local governments, and the two-year Master of Public Administration Program, which prepares graduates for leadership careers in public service. The School also sponsors centers focused on information technology, environmental finance, and civic education for youth.

The Institute of Government is the largest university-based local government training, advisory, and research organization in the United States, offering up to 200 classes, seminars, schools, and specialized conferences for more than 12,000 public officials each year. In addition, faculty members annually publish approximately fifty books, periodicals, and other reference works related to state and local government. Each day that the General Assembly is in session, the Institute's *Daily Bulletin*, available in electronic format, reports on the day's activities for members of the legislature and others who need to follow the course of legislation.

The Master of Public Administration Program is a full-time, two-year program that serves up to sixty students annually. It consistently ranks among the best public administration graduate programs in the country, particularly in city management. With courses ranging from public policy analysis to ethics and management, the program educates leaders for local, state, and federal governments and nonprofit organizations.

Operating support for the School of Government's programs and activities comes from many sources, including state appropriations, local government membership dues, private contributions, publication sales, course fees, and service contracts. Visit [www.sog.unc.edu](http://www.sog.unc.edu) or call 919.966.5381 for more information on the School's courses, publications, programs, and services.

XXXVI Workweek and Overtime Policies	92
XXXVII Employee/Retiree Health Insurance	94
XXXVIII Life and Liability Insurance	98
XXXIX 401k Plan, Position Classification, and Pay System	100

## Introduction

Since 1950 the Institute of Government has published information on salaries and working conditions in North Carolina counties to meet the needs of elected and appointed officials in reviewing current personnel practices. Ninety-three North Carolina counties participated in this year's survey of ninety-five appointed classes or positions and four elected positions.

This report contains salary and wage profiles by position and information about fringe benefits that participating counties are offering for the 2006–2007 fiscal year. For the first time in this report, emergency telecommunications data is presented in a new table—Table XVII—separate from law enforcement listings. The job titles that the counties used to provide the salary and compensation data are included. Salary amounts have been rounded to the nearest dollar except for hourly salaries. Salaries, travel allowances, and employee benefits are expressed in annual amounts unless otherwise noted.

Estimated county population projections for 2006 and assessed property valuations for each county for fiscal year 2006–2007 are presented on the North Carolina state map on page 1 and in Table 1 on page 2. Both population estimates and property valuations are based on estimates provided by the individual counties. For this reason, information presented here may vary from projections available from other sources.

All counties responding to the survey participate in the North Carolina Local Government Employees' Retirement System (NCLGERS).

Twenty-one counties awarded performance pay increases for 2006–2007. The percentage of employees who received performance increases ranged from a low of 4.0 percent to a high of 100 percent of employees in the counties reporting a performance pay increase. The average was 69.6 percent (up from 49.6 percent the previous year) for those counties providing any such increase.

Sixty-seven counties (down from seventy-five the previous year) reported awarding their employees an across-the-board cost of living adjustment (COLA). The COLAs ranged from a low of 1.0 percent to a high of 7.6 percent. The average COLA was 3.2 percent (up from 2.9 percent last year). Fifteen counties reported awarding their employees both a COLA and a performance pay increase.

The School of Government is grateful for the cooperation of the county officials who reported information for this publication. We also thank Larry Kerr and the MAPS Group whose work makes this compilation possible.
